

# AUTOTRANSLATOR

## Installation and configuration guide

### Installation

This module is installed in a regular way. Simply upload the archive and click install.

### Setting up Translation Provider (Translation Engine)

First of all you should connect a Provider that will be responsible for processing automatic translations. You can select one of the following Providers: **Google**, **DeepL**, **Yandex**, **Watson (IBM)**, or **Microsoft**. In order to connect a provider you should specify API Key (and other credentials if required).

Select translation provider

Google Cloud Translate

Pricing options  Free trial available: 300 USD credit for 12 months

API key

Insert API key here

How to get API key 

The guide for obtaining API credentials can be found below fields that should be filled in.

### Translation limits

Some providers offer free translation packages:

**Microsoft** offers a free limit of 2 million chars/month. **Watson (IBM)** offers a free limit of 1 million chars/month. **DeepL** offers a free limit of 500 000 chars/month. **Google** doesn't offer a free translation limit, but it offers you a 300 USD credit on first registration. This credit can be used for automatic translations.

Each provider offers paid packages that can be used to translate as many characters as you need. Pricing details as well as free package informations can be found below selected provider option:

Select translation provider

Google Cloud Translate

## Supported languages

**Google Cloud Translate** supports translations for the following languages in both directions:

af, am, ar, az, be, bg, bn, bs, ca, ceb, co, cs, cy, da, de, el, en, eo, es, et, eu, fa, fi, fr, fy, ga, gd, gl, gu, ha, haw, hi, hmn, hr, ht, hu, hy, id, ig, is, it, iw, ja, jw, ka, kk, km, kn, ko, ku, ky, la, lb, lo, lt, lv, mg, mi, mk, ml, mn, mr, ms, mt, my, ne, nl, no, ny, pa, pl, ps, pt, ro, ru, sd, si, sk, sl, sm, sn, so, sq, sr, st, su, sv, sw, ta, te, tg, th, tl, tr, uk, ur, uz, vi, xh, yi, yo, zh, zh-TW, zu

**DeepL Translator** supports translations for the following languages in both directions:

bg, cs, da, de, el, en, es, et, fi, fr, hu, it, ja, lt, lv, nl, pl, pt, ro, ru, sk, sl, sv, zh

**Watson (IBM) Translate** recognizes most languages, but supports only selected translation directions:

ar-en, bg-en, ca-es, cs-en, da-en, de-en, de-fr, de-it, el-en, en-ar, en-bg, en-cs, en-da, en-de, en-el, en-es, en-et, en-fi, en-fr, en-ga, en-he, en-hi, en-hr, en-hu, en-id, en-it, en-ja, en-ko, en-lt, en-lv, en-ms, en-nb, en-nl, en-pl, en-pt, en-ro, en-ru, en-sk, en-sl, en-sv, en-th, en-tr, en-ur, en-vi, en-zh, en-zh-TW, es-ca, es-en, es-fr, et-en, fi-en, fr-de, fr-en, fr-es, ga-en, he-en, hi-en, hr-en, hu-en, id-en, it-de, it-en, ja-en, ko-en, lt-en, lv-en, ms-en, nb-en, nl-en, pl-en, pt-en, ro-en, ru-en, sk-en, sl-en, sv-en, th-en, tr-en, ur-en, vi-en, zh-TW-en, zh-en

**Microsoft Translate** supports translations for the following languages in both directions:

af, ar, bg, bn, bs, ca, cs, cy, da, de, el, en, es, et, fa, fi, fil, fj, fr, he, hi, hr, ht, hu, id, is, it, ja, ko, lt, lv, mg, mi, ms, mt, mww, nb, nl, otq, pl, pt, ro, ru, sk, sl, sm, sr-Cyrl, sr-Latn, sv, sw, ta, te, th, tlh, to, tr, ty, uk, ur, vi, yua, yue, zh-Hans, zh-Hant

**Yandex.Translate v1.5** supports translations for the following languages in both directions:

af, am, ar, az, ba, be, bg, bn, bs, ca, ceb,cs, cy, da, de, el, en, eo, es, et, eu, fa, fi, fr, ga, gd, gl, gu, he, hi, hr, ht, hu, hy, id, is, it, ja, jv, ka, kk, km, kn, ko, ky, la, lb, lo, lt, lv, mg, mhr, mi, mk, ml, mn, mr, mrj, ms, mt, my, ne, nl, no, pa, pap, pl, pt, ro, ru, si, sk, sl, sq, sr, su, sv, sw, ta, te, tg, th, tl, tr, tt, udm, uk, ur, uz, vi, xh, yi, zh

NOTE 1: Some specific iso codes can be automatically substituted with a language that is supported by current translation provider. For example "gb" (British English) is not supported by default, but it will be recognized by translation provider as "en" (English). In the same way "mx" (Mexican) will be recognized as "es" (Spanish), or "qc" (Canadian French) will be recognized as "fr" (French).

NOTE 2: If you want to translate to a language that is not installed in your store, you should add it in a regular way: either import language pack data in **International > Localization** menu, or add language manually in **International > Localization > Languages** menu.

## Translating different resources

After connecting a Translation Provider, you can start translating different resources of your store. Current module version allows you to add automatic translations for the following resources:

- Products
- Categories
- Attribute Groups and Attributes
- Features and Feature values
- CMS Pages
- CMS Categories
- Manufacturers
- Suppliers
- SEO and URLs (Shop Parameters > Traffic & SEO)
- Articles/Categories of **Amazing blog** module (if module is installed)
- Articles/Categories of **Simple blog** module (if module is installed)
- Articles/Categories/Sliders/Galleries/Autors of **Blog** module (by ETS-soft) (if module is installed)
- Articles/Categories of **Advance Blog** module (if module is installed)
- Home text editor module content (if module is installed)

After selecting a resource type you will see a list of available items that are ready to be translated. If you select **Products**, you will have possibility to filter them by categories/manufacturers.

|                                                                              |                  |           |
|------------------------------------------------------------------------------|------------------|-----------|
| <input type="checkbox"/> 8 Mug Today is a good day                           | FR: 100% PT: 0%  | Translate |
| <input type="checkbox"/> 7 Mug The adventure begins                          | FR: 100% PT: 0%  | Translate |
| <input type="checkbox"/> 6 Mug The best is yet to come                       | FR: 100% PT: 0%  | Translate |
| <input checked="" type="checkbox"/> 5 Today is a good day Framed poster      | FR: 100% PT: 10% | Translate |
| <input checked="" type="checkbox"/> 4 The adventure begins Framed poster     | FR: 100% PT: 0%  | Translate |
| <input checked="" type="checkbox"/> 3 The best is yet to come' Framed poster | FR: 100% PT: 9%  | Translate |
| <input checked="" type="checkbox"/> 2 Sweater                                | FR: 100% PT: 33% | Translate |
| <input checked="" type="checkbox"/> 1 Hummingbird printed t-shirt            | FR: 100% PT: 67% | Translate |

10 of 20

☐ CHECK ALL

BULK TRANSLATE (5)

You can translate items one by one by clicking the **Translate** button in each row, or you can make a bulk selection and translate multiple items in one click.

NOTE: Translations are saved in a native way, same as if you added them manually on product sheet and clicked **Save** button. After translations are ready, you can edit them in a regular way like you edit any other multilingual field of products, categories, attributes, etc...

## Translation ratios

You will notice translation ratios in each product row. This data represents ratio of non-empty fields in original language compared to number of translated fields in another language.

|                                        |                  |           |
|----------------------------------------|------------------|-----------|
| The adventure begins Framed poster     | FR: 100% PT: 0%  | Translate |
| The best is yet to come' Framed poster | FR: 100% PT: 9%  | Translate |
| Sweater                                | FR: 100% PT: 33% | Translate |
| Hummingbird printed t-shirt            | FR: 100% PT: 67% | Translate |

NOTE: if a field has the same value in both languages, first time it will be considered as **not translated**. For example you have a product called **iPhone X**. This name can be same in many languages. So when this item is listed for the first time, its name will be considered as **not translated**, so translation ratio will be less than 100%. But if you translate this product using autotranslator, module will remember the repeating translation value, and next time this name will be considered as **translated**. So, if other fields are translated too, the ratio will be 100%.

## Overriding existing translations

By default this module translates only **empty** fields, or fields having **same value** as original. If a field is not empty and it has a value that is different from original, it will be considered as translated, so it will not be translated again. If you want to update translations for fields that are already translated, you have to uncheck the following option:

|                                                                                                                     |          |            |                |
|---------------------------------------------------------------------------------------------------------------------|----------|------------|----------------|
| TRANSLATE                                                                                                           | Products | All fields | TRANSLATION I  |
| <input checked="" type="checkbox"/> Translate <b>only empty</b> fields or fields with <b>same value</b> as original |          |            | Characters pro |
