

Module : EASY GOOGLE ADDRESS AUTOCOMplete

Creation date 14 Avril 2020

Version : 1.0.0

1. Installation :

After you get the zip file , you go to module manager and you click to install module , then upload the module and activate it

2. Description

Enhance your Prestashop checkout and user experience with our Google address auto complete module. As a customer begins to type their address, Easy Google auto complete will kick in and suggest addresses. Once an address is selected the additional fields such as town and postcode will auto fill, speeding up the checkout process!

3. Setup key map

- Goto <https://console.cloud.google.com> and login with your Google Account or create an account.
- Create a Project on Google Cloud Console.
- Enable the following API's on your project:

Maps Javascript API , Places API

- You will have to setup the Google Billing account as well.
- Create a Key named HTTP Key and under the website restrictions tab add your website URL like the following If your website is my-domain.com add this: **`https://my-domain.com/*`**
