

PrestaShop

1 - Informations

The screenshot displays the 'Atos - Worldline' module information page in PrestaShop 1.7.6.0. The interface includes a top navigation bar with the PrestaShop logo, version, and search bar. A left sidebar contains various icons for navigation. The main content area is titled 'INFORMATIONS' and features the ScaleDEV and Atos Worldline logos. The information is organized into sections: PrestaShop version (compatible), Overrides detected (none), PHP version (compatible), Settings of php.ini (max_execution_time: 600, memory_limit: 512M, max_input_vars: 10000), Module version (1.0.0), Licence (commercial), and Support (contact link).

Category	Value
PrestaShop version	Compatible PrestaShop version (used version : 1.7.6.0)
Overrides detected	Any override detected
PHP version	Compatible PHP version (used version : 5.6.40-0+deb8u7)
Settings of php.ini	max_execution_time : 600 memory_limit : 512M max_input_vars : 10000
Module version	1.0.0
Licence	This module is under a commerciale licence from ScaleDEV society. Any unauthorized use find yourself liable
Support	Click here to contact us

This page allows you to obtain various informations :

- the version of your PrestaShop ;
- the overrides detected ;
- the version of your PHP ;
- the configuration of your "php.ini" file ;
- the version of your module ;
- the FR and EN documentations ;
- the licence ;
- the support.

2 - Parameters

The parameters are composed of three parts :

- the general parameters ;
- the contracts ;
- the paiement methods.

2.1 - General parameters

5 parameters are present here and can be modified at will.

2.1.1 - Debug mode

🔧 Debug mode

ENABLED

DISABLED

The debug mode, if enabled, allows additional error messages to be displayed within the module to better understand some of the errors that may occur. It has no impact on the functioning of the module.

WARNING ! However, be aware that if you leave the debug mode enabled and an error occurs when a customer tries to make a payment, the same customer may see an error message for you (with visibility on the paths to configuration files such as the binaries directory and the pathfile directory).

2.1.2 - Redirection after payment

↔ Redirection after payment

To the Atos confirmation page

Two possible options :

- **To your shop** : the customer is directly redirected to your shop after the transaction.
- **To the Atos confirmation page** : the customer is first redirected to the Atos - Worldline confirmation page before being redirected to your shop.

2.1.3 - Behavior of payment errors

⚠ Behavior of payment errors

Save the order as a payment error and keep the cart

Two possible options :

- **Save the order as a payment error and keep the cart** : it allows to keep the customer's cart.
- **Doing nothing** : the customer's cart will be lost after the failure of his transaction.

2.1.4 - Binaries path

>_ Binaries path

/modules/sdevatos/bin/

100 characters maximum.

By default, the binaries are located in the "bin" directory of the module. However, as the full path of the binary cannot exceed 100 characters, it is possible to move them to another directory on your server. If the directory does not exist, it will be automatically created.

WARNING ! if you change the binaries path, the previous folder will not be deleted. Be careful not to change it too often or delete unused folders.

2.1.5 - Pathfile path

🔗 Pathfile path

/modules/sdevatos/param/

100 characters maximum.

By default, the "*pathfile*" file and the "*parmcom*" files are located in the "param" directory of the module. However, as the complete path of the *pathfile* cannot exceed 100 characters, it is possible to move them to another directory on your server. If the directory does not exist, it will be automatically created.

WARNING ! If you change the path of the pathfile, the previous folder will not be deleted. Be careful not to change it too often or delete unused folders.

2.2 - Contracts

CONTRACTS 2								
ID	Bank	SIPS version	Test mode	Reference	3D-Secure	Creation	Update	
#1	CCF - Elysnat	2.0	Yes	Reference	Yes	2019-11-21 15:11:26	2019-11-21 15:11:26	 
#2	Crédit Agricole - Etransactions	1.0	No	ID	Yes	2019-11-25 15:47:26	2019-11-25 16:39:10	 

The contracts each represent a contract that you have signed with a bank. You can configure several options for a contract.

2.2.1 - The SIPS version

SIPS version

2.0

1.0

Define whether you are using version 1.0 or 2.0 of SIPS. This information should be in your contract.

2.2.2 - The test mode

Available for SIPS 2.0 only.

Test mode

ENABLED

DISABLED

Define whether you want to enable the test mode or not.

2.2.3 - The executable version

Available for SIPS 1.0 only.

Executable version

Normal

Select the version of the executable corresponding to your contract.

2.2.4 - The execution rights correction

Available for SIPS 1.0 only.

Click this button if you think you don't have the execution rights on the executables.

Correct execution rights

You have a button to correct the execution rights of executables. If you are not sure if you have the execution rights for these files, click on this button. Your customers will not be able to perform transactions if you do not have the necessary rights to these executables.

2.2.5 - The bank

Bank

- Select your bank

Select the bank with which you have a contract.

2.2.6 - The merchant ID

Merchant ID

123456789012345

The Merchant ID is composed of 15 digits. Your bank should have provided you with this information. If this is not the case, please contact your bank advisor.

Enter the Merchant ID corresponding to your contract. For SIPS version 1.0, this field is automatically generated.

2.2.7 - The certificate

Available for SIPS 1.0 only.

Certificate

Parcourir...

Aucun fichier sélectionné.

The certificate must be named, for example : "certif.fr.012345678912345".

Upload the certificate corresponding to your contract to also generate your Merchant ID.

2.2.8 - The secrete key

Available for SIPS 2.0 only.

Secrete key

Enter the secret key communicated in your contract.

2.2.9 - The key version

Available for SIPS 2.0 only.

Key version

Enter the version of your key.

2.2.10 - The transaction reference

Available for SIPS 2.0 only.

Transaction reference

REFERENCE

ID

Choose if you want to use TransactionId or TransactionReference. Please refer you to your contract to know which option to use.

Choose whether you use the "*TransactionId*" or the "*TransactionReference*" according to your contract.

2.2.11 - The reference or the ID

Reference or ID

Leave blank if it is generated by SIPS.

Enter the transaction reference or ID or leave this field blank if it is generated by SIPS.

2.2.12 - The 3D-Secure

3D-Secure

ENABLED

DISABLED

Please refer you to your contract to know if you have this option.

Define whether or not you enable 3D-Secure according to your contract.

WARNING ! If you disable 3D-Secure, it is possible that your customers' transactions will be rejected by your bank. Be sure to check that you have this option in your contract.

Once the contract is configured, all you have to do is save to see it displayed in the list of your contracts.

You can add, modify or delete them at any time.

WARNING ! If you delete a contract related to one or more payment methods, it will also delete the associated payment method(s).

2.3 - Payment methods

PAYMENT METHODS 2												
ID	Contract	Name	Enabled	Min amount	3D-Secure from	Mode	Delay	First cashing	Creation	Update		
#1	#1	Credit card	Yes	0.000000€	0.000000€	Automatic	0 day	100.000000%	2019-11-21 15:11:42	2019-12-04 16:44:58		
#2	#2	CB 2X	Yes	0.000000€	0.000000€	Manual	0 day	50.000000%	2019-11-22 16:56:49	2019-12-04 14:59:10		

Here you have a complete list of all the payment methods you have configured.

2.3.1 - The activation

Enable

YES

NO

Choose whether or not to activate the payment method. If you disable the payment method, you can still save it but it will not be visible to your customers.

2.3.2 - The contract

Contract linked

- Select a contract to link

Select a contract to link to your payment method.

2.3.3 - The name

Name

Credit card

Enter the name of the payment method that will appear on your site during a transaction.

2.3.4 - The payment method

Payment method

- Select a payment method

Select your payment method from the list.

WARNING ! If the contract related to the payment method uses version 1.0 of SIPS, only credit card payment methods in 1, 2 or 3 times will be available.

2.3.5 - The minimum amount

Enable from

€ 0

If your payment method is enabled, enter the minimum amount from which it will be enabled.

2.3.6 - The minimum amount for 3D-Secure

Only available if the contract related to the payment method has 3D-Secure enabled.

Enable 3D-Secure from

€	0
---	---

Enter the minimum amount from which 3D-Secure must be activated.

WARNING ! If 3D-Secure is disabled on a transaction because the amount of the transaction is lower than the amount from which to enable 3D-Secure, it is possible that your bank will refuse the transaction.

2.3.7 - The cashing mode

Cashing mode

AUTOMATIC	MANUAL
-----------	--------

Define the collection mode you want to use : "*Automatic*" or "*Manual*".

WARNING ! In "*Manual*" mode, you must validate your payments before the validation deadline set by your bank.

2.3.8 - The delay before debit

Delay before debit

days	0
------	---

Enter an integer to define the number of days between when your customer makes a transaction and when it will be debited.

2.3.9 - The first cashing percentage

Only available for multiple payments.

First cashing percentage

%	50.000000
---	-----------

Enter a value that represents, as a percentage, the amount of the first incoming payment in the case of a payment in several installments.

Once your payment method has been configured, all you have to do is register to see it displayed in the list of your payment methods.

You can add, modify or delete them at any time.
